

WHAT YOUR COVID-19 TEST RESULTS MEAN

If your test is positive, you have COVID-19.

- Stay home and away from others.
- Rest and drink lots of water.
- Call 911 if it gets hard to breathe or your symptoms get worse.

If your test is negative, you do not have COVID-19 right now.

If you are **not** fully vaccinated and were near someone with COVID-19, stay home and away from others. It can take up to 14 days to become sick, so continue to monitor your symptoms. If symptoms continue, contact your health care provider.

Stay 6 feet away from others

Avoid crowds
