

SYMPTOMS/SICK DECISION TREE

More Common Symptoms (1 or more)

Less Common Symptoms (2 or more)

What should I do if I have symptoms of COVID-19?

I received a laboratory test for COVID-19.

I have a COVID-19 diagnosis without a lab test OR symptoms consistent with COVID-19 without a medical evaluation (e.g., monitoring symptoms at home).

I have a diagnosis (e.g., norovirus, strep throat) that explains the symptoms, or my healthcare provider says symptoms are connected to a preexisting condition.

Positive test result: Stay home at least 10 days since symptoms first appeared AND until no fever for at least 24 hours without medication AND improvement of other symptoms.

Stay home at least 10 days since symptoms first appeared AND until no fever for at least 24 hours without medication AND improvement of other symptoms.

Stay home until symptoms have improved. Follow specific return guidance from the healthcare provider.

Negative test result but symptoms with no other diagnosis: Stay home at least 10 days since symptoms first appeared AND until no fever for at least 24 hours without medication AND improvement of other symptoms.

If symptoms related to a preexisting condition change or worsen, talk to a healthcare provider.
